

Informed Consent Form

Please read this consent document carefully before you decide to participate in this study. I will answer any questions before you sign this form.

Study Title: Educating programmers on the identification of bad practices and how to refactor for cleaner code within the games industry.

Purpose of the Study: Determine participator's understanding of their programming solution to find the most effective tool. Participants were chosen at random.

Procedures: Participants will be asked to write a programming solution to a couple tasks. This should take about 15-20 minutes.

Potential Risks of Participating: The risks are no more than the having the time available to complete the experiment.

Confidentiality: Your identity won't be kept in any form other than this consent form, which will be kept separate from all other information. Your solutions to the tasks will only be kept until they've been analysed, then they will be deleted. Your name won't be used in any report.

Voluntary Participation: Your participation in this research is completely voluntary and you are free to withdraw from the experiment at any point, there will be no pressure to complete the tasks in full.

Contact Details: If you have any questions about this form or the research at any point, feel free to ask me any questions, my name is Cole Gilbert. You can also email me directly at cq233192@falmouth.ac.uk.

Agreement: I have read the details listed above and I voluntarily agree to participate in this research. I have also received a participant information sheet detailing the study I'm partaking in.
